

PORTABLE FIELD KITCHEN – MODEL CF85

The CF85 is a lightweight, transportable LPG kitchen designed to cater for up to 120 people depending on menu. The kitchen is easily deployable and can be operational within minutes.

Greater flexibility in catering numbers can be gained when it is used in combination with the CF83 portable cooker or CF84 trailer mounted kitchen.

BURNERS

The CF85 has 5 burners, 4 rosette burners rated at 6.5Kw each and 1 ribbon burner rated at 8.8Kw. The rosette burners are for general cooking purposes and the ribbon burner is used either for heating the Griddle Plate or the optional Oven Universal.

FUEL

The CF85 is fuelled by LPG (Liquefied Petroleum Gas).

CONSTRUCTION

The main body is constructed from powder-coated carbon steel with the fold out windshield and table being constructed from stainless steel. There are holes in the base where the burners are housed, to allow the unit to drain after cleaning. For transportation and storage, the table folds down over the main body to protect the burners and the support legs fold into the main body and table to minimise the volume. Carrying handles are located at each end of the unit. The unit comes complete with a set of 6 225mm square foot plates, complete with securing clips and chains for use on soft ground, sand or snow.

ADDITIONAL INFORMATION

The CF85 is supplied with the standard set of cooking utensils listed overleaf.

WEIGHTS AND DIMENSIONS

Closed: Height - 300mm
Length - 1200mm
Width - 700mm

Open: Working
Height - 750mm
Length - 2400mm
Width - 700mm

Weight: 77kgs

PACKING SPECIFICATION

1 x Case: 1480 x 760 x 530mm
