

## MULTI-FUELLED TWIN BURNER - MODEL HM93

The Hawkmoor Multi-Fuelled Twin Burner (HM93) is a compact and rugged portable multi-fuelled cooker. The cooker has a one (1) litre fuel tank that is pressurised by means of an integrated pump and operates using Diesel, Kero (A) or Avtur fuels.

Each of the two burners incorporates new burner technology and produce 3Kw of heat that can be independently controlled by means of control valves, visible in the second picture. Tank capacity – 1.7 Litres with a burn time with both burners in operation of 4.72 hours.

### CONSTRUCTION

The main frame of the unit is constructed from carbon steel that is then powder coated. The fuel tank and the inner shroud are made from stainless steel.

The front face houses the control valves and fuel tank pump.

The unit is GN container compatible (not supplied) as illustrated in the pictures opposite and can also be used with the stainless steel rack shown in the bottom picture. This rack allows for smaller containers, such as Mess Tins, to be used for cooking purposes, or for directly heating individual tins of food from ration packs.

Two hand positions are built into the twin burner facilitating transportation of the unit and an on-board multi-spanner allows for maintenance to be carried out by the operator.

### OPTIONAL EXTRAS

Griddle Pan

GN Inserts and Lids

### DIMENSIONS

Maximum Height - 130mm  
Length - 530mm  
Depth - 324mm
