

# Off-Road Mobile Clinic

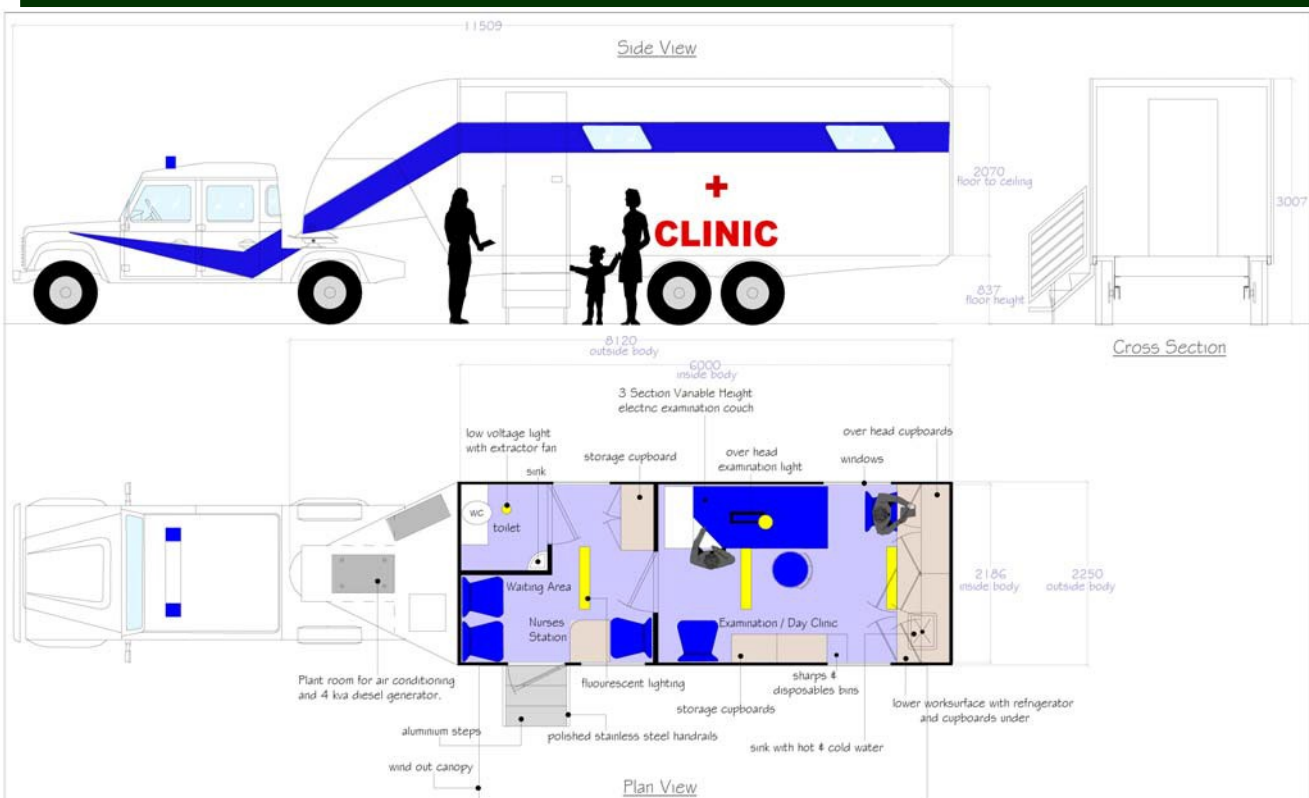

**Providing specialist medical facilities in remote locations that are difficult to reach with normal vehicles.**

Specifically designed and built for challenging terrains the off-road clinic is fitted out for a wide range of medical duties including general practice, minor operations or X Ray.

The sterile, mobile clinic arrives on site and is instantly ready to provide medical services such as monitoring Malaria, Dengue, Vaccinations, HIV, Paediatrics, Dialysis, TB, Dental, Optical and Medical Treatments.

A typical fit would include:

- Separate Waiting Area and Treatment Room
- Clinic fully air conditioned
- Fitted out with electrics, lighting, examination bed, administration area
- Medical workbench with storage
- Cassette type toilet with cubical, door, sink and low voltage light with extractor in ceiling
- Sink with waste and fresh water tanks
- 4kva diesel generator in sound insulated housing

## The Off-Road Clinic is designed to provide medical facilities in difficult to get to areas.

The mobile clinic has a sterile medical environment that is fully weather proof, air conditioned, well lit and professionally equipped to meet the needs of the user.

The trailer unit is pulled by a Land Rover or similar 4 wheel drive vehicle which has been specially adapted with a fifth wheel coupling and air brakes.

Standard driving licence required, therefore, a member of the medical team can drive the unit.

Trailer has high ground clearance and is designed for poor road conditions and uneven surfaces.

Right or left hand drive.

The off-road chassis has wind down stabilising legs, tandem axle with Land Rover wheels and tyres, for commonality in case of puncture.

Easy maintenance of towing vehicle. A car mechanic can undertake servicing and repairs.

The Off-Road Clinic is self contained and ready to use in under 30 minutes.

On board generator (that uses the same fuel as the towing vehicle).

Air conditioning unit, refrigerator and on board water storage which makes it a quick solution for providing immediate healthcare.

### TRAILER DIMENSIONS

#### Inside body

6m long  
2.18m wide  
2.07m floor to ceiling

#### Outside trailer body

8.12m long  
2.25m wide  
3m high.
