

PORTABLE COOKER – HM11

The HM11 is a compact and lightweight portable cooker designed to serve 1-5 men under field conditions. Notable features of the unit are its reliability, versatility and ease of operation.

BURNER

The single burner has a maximum output of 3Kw. The unit incorporates a jet cleaning pin that operates when the unit is opened or closed. This eliminates the need to remove the jet for cleaning.

FUELS

The HM11 can be fuelled by Kerosene, Paraffin, Diesel, Avtur or similar.

CONSTRUCTION

The burner and fuel tank are housed within a powder coated carbon steel casing which opens out when in use and closes up into a box for transportation and storage.

The burner flame can be controlled by the control knob which is shown in place at the side of the unit but which is stored away in the casing when not in use.
